

# Best Plastic Management is specialized on mechanical plastic recycling and the production of high-quality PS and PP regranulate with ample capacity to grow

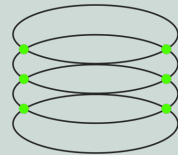

## Investment Hypotheses

Strong market tailwinds due to consumer preferences and regulatory requirements

Tangible organic and inorganic growth opportunities in a fragmented industry

Aim to position BPM as one of the leading plastic recycling companies in the DACH region through tripling of on-site capacity and selected add-on acquisitions

## Impact Theme

## Circular Economy

*CO<sub>2</sub> Avoidance / mEUR Invested*  
*> 3'000 tons p.a.*

**Profile** Post-industrial and post-consumer waste is sorted, grinded, melted and compounded to create high-quality PS and PP regranulates and regrinds suitable for a variety of applications

**Development Potential** BPM has ample capacity to grow its output organically from 20k tons to up to 60k tons per annum, targeting different material types and applications. Vidia recognizes the potential of consolidating specialized recycling companies into a highly professionalized provider of recycled plastic, including in-house development of customer specific compounds

**Impact** While plastic recycling capacity represents a bottleneck in the market for years to come, BPM's processing volume represents a significant contribution to the replacement of high emission primary plastic

## Business Model

Plastic recycling - manufacturing of high-quality PS and PP regranulates and regrinds

## HQ

Near Bremen, Germany

## Investment Date / Type

August 2023 / Majority

## Opportunity

Succession situation / Operational scale-up

## Impact

Replace virgin plastic (> 3'000 tons CO<sub>2</sub> avoided p.a. / mEUR equity investment)
